

Plan 821 0632
Carriage Lane Place
S.W. $\frac{1}{4}$ SEC.9
Twp-30 Rg-1-
West of the 5th Meridian
Carstairs, Alberta

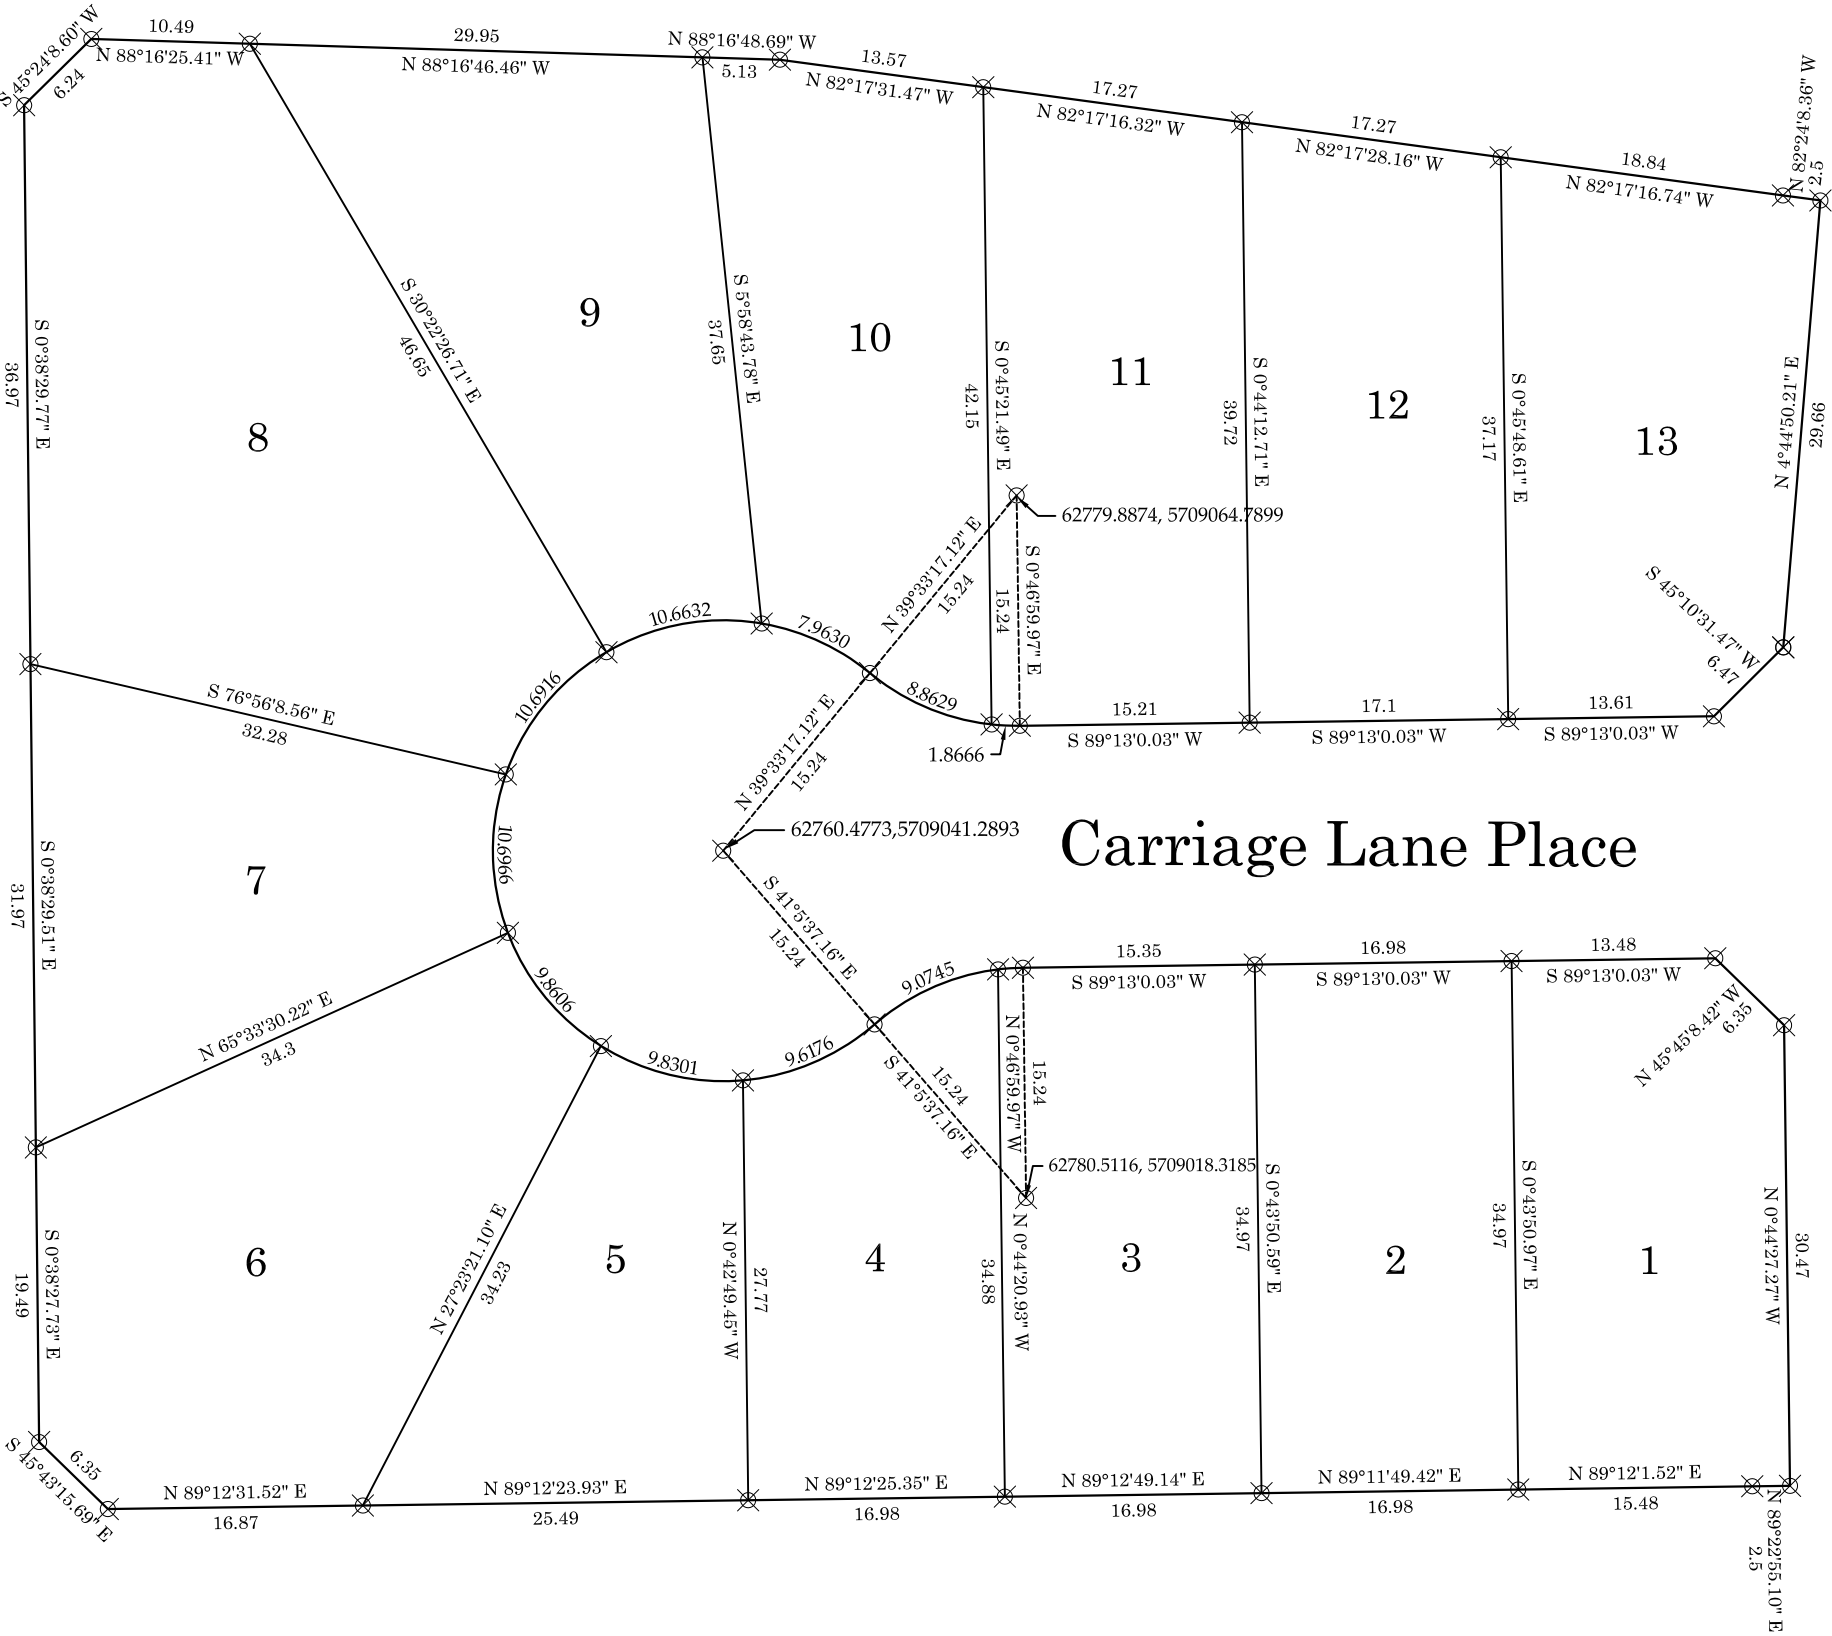

Map produced by Kirsten Harrison as required by the Geographic Sciences course (GEOS 2500). This is a student exercise and remains unedited and unverified.
For visual representation purposes only.

This plan was created using the AutoCAD program. Lines and coordinates (given in Surveyors units) were provided and created using the line tool. Once all of the lines were created, points were placed at each intersection.
The cul-de-sac was created by using the circle command, starting at the designated point and then cut using the fillet tool. This created the "arc" of the cul-de-sac.
Using the break tool, the arc was then broken into individual points to obtain their lengths. Once the lengths were obtained, the "list" function and Arc Aligned Text tool were used to accurately place the text in the correct spot.

- Lot Line
- Block Line
- Tie Line
- Pin Placed
